Dear Esther and OEHHHA

Please forgive me if I am resending this. I want to make sure you have the studies attached from China that show many forms of harm from glyphosate. I was told these studies have not been sent to the Federal EPA, so they would be new evidence to consider.

Please, also consider the study from Monika Krueger that shows glyphosate **bioaccumulates**.

<https://www.omicsonline.org/open-access/detection-of-glyphosate-residues-in-animals-and-humans-2161-0525.1000210.pdf>

Because of this reason alone, along with many others, this proves there is no safe level of glyphosate. Zero is the only number you can responsibly put out to protect fetuses, babies and humans from harmful exposure to glyphosate.

Glyphosate herbicides are **endocrine disruptors** (which can lead to

cancer) <https://d3n8a8pro7vymx.cloudfront.net/yesmaam/pages/680/attachments/original/1497907951/1-s2.0-S0300483X09003047-main.pdf?1497907951>

Thyroid cancer is a massive problem. See this study linking glyphosate and perinatal

exposure: <http://www.sciencedirect.com/science/article/pii/S0300483X16302645>

Glyphosate causes **cardiovascular toxicity** and damage to zebra fish heart

https://d3n8a8pro7vymx.cloudfront.net/yesmaam/pages/680/attachments/original/1471362543/Glyphosate_induces_cardiovascular_toxicity.pdf?1471362543

Glyphosate stimulates growth of breast cancer cells at 1 ppT.

<http://www.gmoeevidence.com/dr-thongprakaisang-glyphosate-induces-growth-in-human-breast-cancer-cells/>

Roundup **CAUSES liver disease a precursor to cancer**, at levels far below that which you are proposing. 1 in 10 Americans now has liver disease.

<https://www.nature.com/articles/srep39328>

Your assessment of 1100 mg per day is far below that which our children are being exposed to, see attached (note the papers I gave the panel at the OEHHHA hearing said 25 pound child, correction 22 pound child.

There is no safe level! Zero!

Thank you!

--
